

Strikvora - Product Requirements Document

1. Project Overview

Problem Statement

Users browse available players, build a squad, and receive a final performance evaluation based on the rules defined in the provided assets.

Product Vision

Build a complete Strikvora football drafting website consisting of:

- Player Draft Center
- Squad Builder
- Draft Results Dashboard

Target Users

- Football gaming enthusiasts
- Fantasy team building enthusiasts
- Strategy focused users
- Competitive sports simulation users

2. Key Features

Player Draft Center

- Display all players contained in strikvora_player_database.xlsx
- Display player position
- Display player rating
- Display player club
- Display player attributes
- Support player selection

Squad Builder

- Display selected players
- Allow squad composition management
- Display squad statistics
- Display chemistry values
- Display synergy values

Draft Results Dashboard

- Display final squad rating
- Display chemistry summary
- Display synergy summary
- Display rank tier

Branding

- Apply colors defined in strikvora_brand_guidelines.pdf
- Apply typography defined in strikvora_brand_guidelines.pdf
- Use club assets from strikvora_club_logos.zip

3. User Flow

- Browse Players
- Select Players
- Build Squad
- View Results
- Receive Rank Tier

4. Functional Requirements
