

Strikvora - Product Requirements Document

1. Project Overview

Problem Statement

A football drafting website is required that recreates the experience represented in `reference_image.png`. The product must present a Player Draft Center, Squad Builder, and Draft Results Dashboard within a single football drafting experience.

Product Vision

Provide a football drafting website where users can browse players, build a squad, review squad information, and view draft results through a responsive interface.

Target Users

- Football gaming enthusiasts
- Fantasy team building enthusiasts
- Strategy focused users
- Competitive sports simulation users

2. Key Features

Player Draft Center

Display player cards, player information, filtering controls, and player selection controls.

Squad Builder

Display selected players, formation layout, squad management controls, and squad information panels.

Draft Results Dashboard

Display result summary cards, statistics panels, chemistry summary panels, and rank information.

Responsive Experience

Support desktop, tablet, and mobile screen layouts.

3. User Flow

1. User enters the website.
2. User reviews available player cards.
3. User interacts with player selection controls.
4. Selected players appear in the Squad Builder.
5. User reviews squad information.
6. User navigates to the Draft Results Dashboard.
7. User reviews statistics, summaries, and rank information.
8. User completes the football drafting session.

4. Functional Requirements

FR-01 The product shall contain a Player Draft Center.

FR-02 The product shall contain a Squad Builder.

FR-03 The product shall contain a Draft Results Dashboard.

FR-04 The Player Draft Center shall display player cards.

FR-05 The Player Draft Center shall display player information.

FR-06 The Player Draft Center shall provide player selection controls.

FR-07 The Player Draft Center shall provide filtering controls.

FR-08 The Squad Builder shall display selected players.

FR-09 The Squad Builder shall display a football formation layout.

FR-10 The Squad Builder shall display squad management controls.

FR-11 The Squad Builder shall display squad information panels.

FR-12 The Draft Results Dashboard shall display result summary cards.

FR-13 The Draft Results Dashboard shall display statistics panels.

FR-14 The Draft Results Dashboard shall display chemistry summary panels.

FR-15 The Draft Results Dashboard shall display rank information.

5. Non-Functional Requirements

Performance

Pages should load without layout breaks.

Responsiveness

The interface should support desktop, tablet, and mobile layouts.

Accessibility

Content should remain readable across supported screen sizes.

Compatibility

The website should function in modern desktop, tablet, and mobile browsers.

6. Screens / Modules

- Player Draft Center
- Squad Builder
- Draft Results Dashboard
- Responsive Layout Experience

7. Deliverables Summary

D-01 Zipped Source Code + README.md

The submission package shall contain:

- HTML files
- CSS files
- JavaScript files
- README.md
- Supporting image assets

8. Technical Notes

Frontend Technologies

- HTML
- CSS
- JavaScript

Constraints

- No backend systems
- No database systems
- No authentication systems
- No external API integrations
- No server-side processing

9. Assets

reference_image.png

The supplied asset is the primary visual reference for layout structure, section arrangement, and interface organization used throughout the project.
